

Aaranya Care Intelligence

Whole-person care intelligence with human authority

WORKING PROTOTYPE

37

automated tests

10.0/10

350 quality checks

Human

final authority

One observation creates four coordination problems

CAREGIVER

Repeats the same observation across notes, calls and handover

NURSE IN CHARGE

Balances urgency against medication rounds and resident requests

FACILITY OPERATOR

Cannot see whether every concern received an owner and response

FAMILY

Calls repeatedly when a factual update does not arrive

Customer hypotheses to validate during design-partner discovery

Beachhead customer and buying trigger

153M

people aged 60 or older in India in
2022

INITIAL CUSTOMER

India-based assisted-living and senior-care operators with multiple shifts or sites

ECONOMIC BUYER

Facility owner, COO or head of care

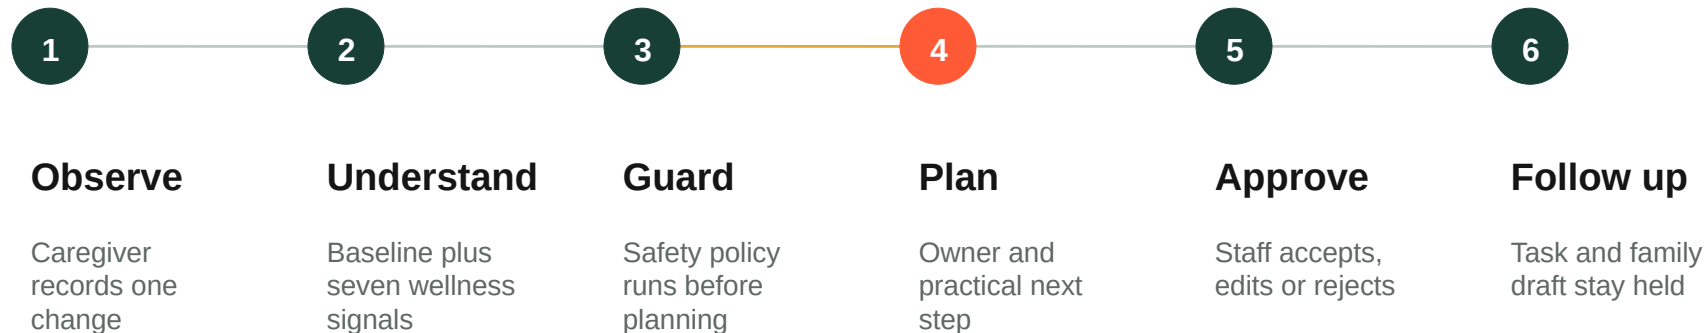

BUYING TRIGGER

Inconsistent escalation, weak handovers or
repeated family follow-up

347M

UNFPA projection for 2050

The care-signal workflow

The product coordinates work. Staff retains authority.

Working prototype and WholeLife Pulse

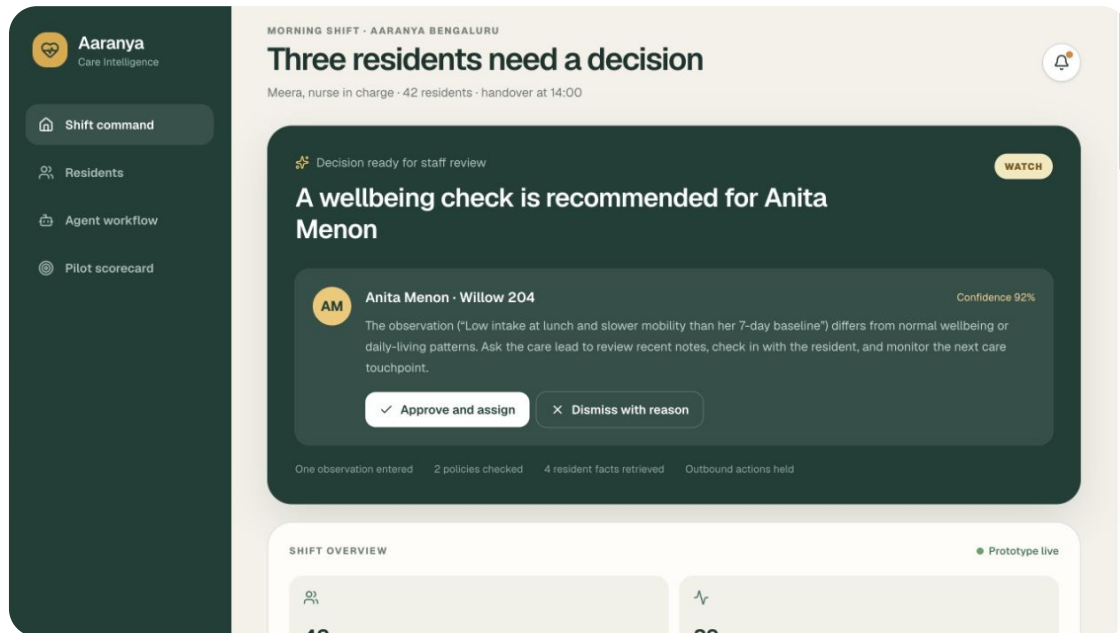

SEVEN DIMENSIONS

Sleep, energy, stress,
movement, nourishment,
connection and purpose

SUPERVISED AGENTS

Evidence, critic and safety
stages end at a human approval
gate

37 tests 350/350 checks

Ninety-day pilot scorecard

30%

FASTER

Observation to owner

versus week-one baseline

≥95%

COMPLETE

Required care-note fields

for escalated events

<30m

MEDIAN

Approved family update

after a care event

≥80%

WEEKLY

Invited staff adoption

during the pilot

Week one establishes the baseline. Weeks two to twelve measure improvement and adoption.

Pilot-led business model

01

DESIGN PARTNER

Two facilities test one escalation workflow and review outcomes each week

02

PRICING HYPOTHESIS

Facility platform fee plus a charge per occupied bed

03

EXPANSION

Policy packs, family communication and multi-site oversight after adoption

Market sizing starts with beds managed by the target operator segment, not India's entire older population.

Defensibility grows through approved workflow data

WholeLife context

Seven wellness dimensions plus resident baselines

Evidence and policy

Stable sources linked to each decision

Action control

Typed tools and explicit human approval

Outcome learning

Evidence from approved actions and follow-through

Aaranya connects whole-person context, policy, ownership, approval and family communication in one trace.

Founder fit and the BITSoM ask

20

years in software and IT

GOWTHAM RAMACHANDRA

Product leadership across Texmed, Trilogy, JPMorgan Chase, IBM and Harman. PGPEM from IIM Bangalore.

12

years in product management

WHAT BITSoM CAN UNLOCK

Operator introductions for discovery and two design partnerships

Guidance on enterprise pricing, evidence design and compliance readiness

Pilot invitation and live demo

WE NEED

One care lead
Two frontline users
One escalation
workflow

YOU RECEIVE

A configured prototype
Weekly findings
A final outcome report

LIVE PROTOTYPE
